

Brent Tanner's Spring 2018 Newsletter

There are many ways to grow old gracefully, one is 'au naturale' as with Bridget Bardot, the other is small incremental rejuvenations as with Sofia Loren.

This update is being sent to all my patients, as I have partially retired and am now concentrating my efforts on non surgical procedures. In my quest to become an expert in the non surgical field I have developed new, effective skills using fillers, botulinum toxin, appropriate skincare, peels and lasers.

Recent advances in the positioning of fillers on the face have brought about significant improvements in the treatments and are enhanced with botulinum toxin and skin therapy. I like to use hyaluronic acid fillers in a technique known as the **liquid facelift**. These procedures are particularly relevant to people who have had facelifts in the past and want a little bit more but do not wish surgery. Also fillers can be used in younger people to stave off surgery.

Botulinum toxin has always been a favourite as it gives reliable results but sadly only lasts between three to four months. I have recently modified my Singapore Sling botulinum toxin technique to include the neck and the **Nefertiti** lift if appropriate.

For deep wrinkles due to sun damage I prefer the Pearl Fractional Laser as it can be administered under local anaesthesia and has a reduced down time of only five to ten days depending on the depth of the wrinkle.

The Pearl laser itself rejuvenates the skin and a combination of the two, called Pearl Fusion is remarkable. If you then combine this treatment with facelift, browlift, blepharoplasty and botulinum toxin you can have remarkable transformations.

Of course many people only have smoker's lines on the upper lip or around the mouth in which case the fractional laser under local anaesthetic is the best option.

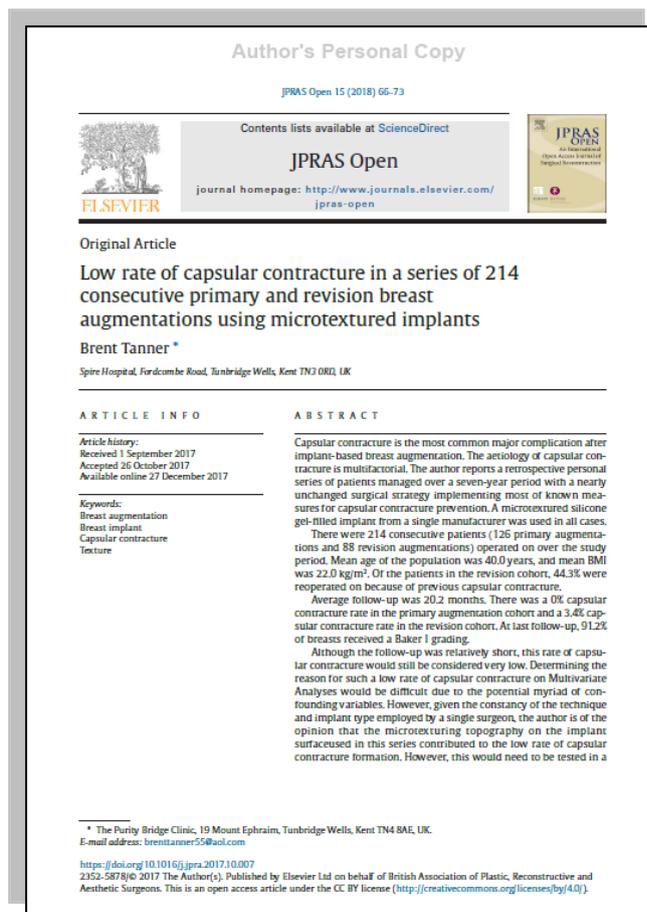

Finally I **still** wish to see my previous patients and discuss further surgery which they might envisage. Although I no longer perform the surgery I can discuss any of the procedures that you can see on my website. After the consultation I will be able to direct you on a course of action, be it surgical or non surgical and to the specialist who would be able to meet your wishes.

I have now moved my administrative office to the Purity Bridge Clinic in the centre of Tunbridge Wells where I work with my colleagues Mr Marc Pacifico and Ms Nora Nugent. My other clinics are in Brighton, the Nuffield Health Brighton Hospital, Woodingdean and the Montefiore Hospital, Hove and a new one in The Lanes Health and Beauty, Brighton. In Tunbridge Wells I still go to Spire Tunbridge Wells as well as our new clinic, Purity Bridge.

I am **still** keeping very active on the teaching front and enclose the article I have just written about Breast implants. It shows that none of the Sebbin implants that I used in 400 breast augmentations have become hard.

In March I was invited to give keynote lectures on abdominoplasty at UKAAPS (UK Association of Aesthetic Plastic Surgeons).

I have also been invited to talk on the life of Sir Archibald McIndoe and would be happy to give a similar talk or on aspects of cosmetic surgery to interested groups on a charitable basis.
